

Travabon®

Oil, Grease and Adhesive Skin Protect Cream

PRODUCT DESCRIPTION

Specialist dual action pre-work cream designed for professional use to protect the skin against heavy levels of oil based and adherent substances, plus makes the skin easier to clean. Lightly perfumed.

WHERE TO USE

Industrial workplaces where it is not practical or feasible to wear gloves.

RECOMMENDED SOILINGS

Water-insoluble substances: solvents, metal-working oils and mechanical soiling.

INSTRUCTIONS FOR USE

Before and During Work:

- Apply 1ml to clean and dry skin before starting each work period and after washing hands.
- Rub on all areas of the hands, including between the fingers and around the fingernails.

After Work:

Prior to washing:

- Apply a small amount of water to hands and rub together to loosen soiling then rinse with running water.
- This action will remove most of the soiling from the hands enabling the use of only a light duty hand cleaner to remove any remaining soiling.

| | DESCRIPTION | BENEFITS |
|----------------------------|---|---|
| FEATURES | Unique dual action formulation | Protects the skin from oil based workplace substances and facilitates effective skin cleansing. |
| | Protects against irritation | Scientifically proven to provide protection against the irritating effects of oil / solvent based substances. |
| | High mineral content | Forms a robust, highly resistant physical protective layer on the skin, which prevents substances from penetrating deeply into the skin. |
| | Independently dermatologically tested | Patch testing shows the product to be non-irritating in use. |
| | Hands are easier to clean | Specialist 'active-rinse' formula enables washing with water alone to remove most soiling when the hands are pre-treated with Travabon® cream. Therefore a lighter cleanser can be used to remove any remaining soiling. |
| INGREDIENTS | Contains a special soil-suspending emulsifier | A blend of surfactants are incorporated into the formula and remain in the protective cream layer on the skin to be activated when hands are pre-rinsed with water. This creates a soil-suspending emulsion that enables most soiling to be removed with water alone. |
| | Contains Glycerin | A skin moisturiser to help prevent drying and leave the skin feeling smooth after use. |
| | Formulated close to the skin's natural pH (4.0-6.5) | Helps minimise disruption from product use to the skin's acid mantle, a natural layer which acts to help support the natural bacteria balance. |
| | Silicone-free | The product will have no adverse effect if in contact with surfaces prior to the application of paint or surface coatings. |
| CERTIFICATES/COMPATIBILITY | ECARF Certified ¹ | This product meets the European Centre for Allergy Research Foundation (ECARF) criteria for skin tolerability. For more information go to http://Ecarf-siegel.org/en/about-seal . |
| | Compatible with rubber production processes | Independently tested at the German Institute of Rubber Technology (DIK) and proven to have no negative effect on the vulcanisation process. |

Travabon®

Oil, Grease and Adhesive Skin Protect Cream

SAFETY DATA SHEETS

For Safety, Environmental, Handling, First Aid and Disposal information please refer to the Safety Data Sheet which can be downloaded from <https://www.scjp.com/en-au/safety-data-sheets>

SHELF LIFE

This product has a shelf life of 30 months from the date of manufacture when stored unopened at room temperature.

CERTIFICATIONS

ECARF Seal of Quality

This product meets the European Centre for Allergy Research Foundation (ECARF) criteria for skin tolerability. Cosmetics can receive the seal of quality for meeting the following criteria:

1. Quantitative risk assessment of the product ingredients with respect to their potential for skin sensitisation, taking into account their specified conditions of use and amount.
2. Medically supervised clinical trials by volunteers with atopic dermatitis.
3. Approved system of quality control management.

For more information go to <http://ecarf-siegel.org/en/about-seal>.

QUALITY ASSURANCE

SC Johnson Professional products are manufactured in facilities which follow appropriate quality assurance practices, including with respect to quality control processes for raw materials and finished goods, and comply with any regulatory requirements applicable to the manufacturing of such products.

PRODUCT SAFETY ASSURANCE

Product Safety Assessment

The product has been assessed by an independent toxicologist and is declared safe for intended use on hands of adults aged 16 years and above when used as directed, meeting all relevant regulatory requirements.

Skin Compatibility Test

Independent dermatological tests conducted to assess the skin compatibility of the product using voluntary test persons in occlusive, 69 consecutive hour application models, shows the product to be non-irritating in use.

COMPATIBILITY TESTS

Rubber Production Process Compatibility

In testing conducted by the Deutsches Institut für Kautschuktechnologie (DIK) in accordance with DIN EN ISO/IEC 17025, the use of Travabon® cream in rubber production process does not influence the cohesive strength of rubber.

INGREDIENTS

AQUA (WATER), TALC, GLYCERIN, SODIUM COCOYL ISETHIONATE, STEARIC ACID, LAURETH-10, DISTARCH PHOSPHATE, POLYGLYCERYL-2 DIPOLYHYDROXYSTEARATE, ALGIN, BENTONITE, XANTHAN GUM, POTASSIUM SORBATE, LACTIC ACID, PARFUM (FRAGRANCE), SODIUM ISETHIONATE, SODIUM PHOSPHATE, DIETHYLHEXYL SODIUM SULFOSUCCINATE, TITANIUM DIOXIDE, PROPYLENE GLYCOL, SILVER CHLORIDE.

EFFICACY TESTS

Barrier Property Test

Repeated Occlusive Irritation Patch Testing using 25 healthy panellists was conducted using one water soluble substance (Sodium Lauryl Sulphate) and one non-water based substance (Ethyl Acetate/ Undecylenic Acid, 1:1). Each substance was applied at one time per day for 30 minutes over 4 days, alternating the water-based substance in the morning and non water based in the afternoon. Results show Travabon® cream significantly reduces the Visual Skin Erythema and Trans Epidermal Water Loss (TEWL) compared to unprotected skin.

Barrier Property Test
Repeated 4 Day Occluded Irritation Test

Hand Cleansing Test

Hand cleansing efficacy was tested using 10 healthy test panellists using a standardised model soiling (carbon black, iron oxide, graphite, petrolatum, oil, wax). Using only water to remove soil, the level of the residual dirt was assessed. Results show that when rinsed with water alone, 91% of the soil is removed from the skin when the hands are pretreated with Travabon® cream.

NB: Skin exposure to potentially harmful substances and environments should be avoided through the implementation of safe working practices and the use of appropriate Personal Protective Equipment. Where skin exposure cannot be avoided, it is recommended to use an appropriate skin protect cream as part of a complete skin care programme to help promote healthy skin conditioning.

PACK SIZES

| STOCK CODE | SIZE | CASE QTY | DISPENSER |
