

Travabon® CLASSIC

Oil, Grease and Adherent Defense Cream

PRODUCT DESCRIPTION

Specialist dual action pre-work cream to defend the skin against heavy levels of oil-based and adherent substances, plus makes the skin easier to clean. Lightly fragranced.

WHERE TO USE

Work places where hands and arms are in contact with water-insoluble substances such as solvents, metal-working oils and mechanical soiling; where it is not practical or feasible to wear gloves.

INSTRUCTIONS FOR USE

Before and During Work:

- Apply 1mL to clean and dry skin before starting each work period and after washing hands.
- Rub on all areas of the hands, including between the fingers and around the fingernails.

After Work:

Prior to washing:

- Apply a small amount of water to hands and rub together to loosen soiling then rinse with running water.
- This action will remove most of the soiling from the hands enabling the use of only a light duty hand cleaner to remove any remaining soiling.

FORMAT: CREAM

	DESCRIPTION	BENEFITS
FEATURES	Unique Dual Action Formulation	Defends the skin against oil-based workplace substances and facilitates effective skin cleaning.
	High Mineral Content	Forms a robust, highly resistant physical protective layer on the skin, which prevents contaminants from penetrating deeply into the skin.
	Defense Against Irritation	Scientifically proven to provide defense against the irritating effects of oil/solvent-based substances.
	Hands Are Easier to Clean	Specialist 'active-rinse' formula enables washing with water alone to remove most soiling when the hands are pre-treated with Travabon® CLASSIC cream. Therefore a lighter cleaner can be used to remove any remaining soiling.
	Independently Dermatologically Tested	Patch testing shows the product to be non-irritating in use.
INGREDIENTS	Contains a Special Soil-Suspending Emulsifier	A blend of surfactants are incorporated into the formula and remain in the defensive cream layer on the skin to be activated when hands are pre-rinsed with water. This creates a soil-suspending emulsion that enables most soiling to be removed with water alone.
	Contains Glycerin	A skin moisturizer to help prevent drying and leave the skin feeling smooth after use.
	Silicone-Free	Reduces the risk of silicone-related compatibility issues, if in contact with surfaces prior to the application of paint or surface coatings.
	Formulated Close to the Skin's Natural pH (4.0-6.5)	Helps minimize disruption from product use to the skin's acid mantle, a natural layer which acts to help support the natural bacteria balance.
COMPATIBILITY	Compatible With Rubber Production Processes	Independently tested at the German Institute of Rubber Technology (DIK) and proven to have no negative effect on the vulcanization process.

Travabon® CLASSIC

Oil, Grease and Adherent Defense Cream

SAFETY DATA SHEETS

For Safety, Environmental, Handling, First Aid and Disposal information, please refer to the Safety Data Sheet which can be downloaded from SDS library on <https://www.scjp.com/en-ca/safety-data-sheets>

SHELF LIFE

This product has a shelf life of 30 months from the date of manufacture when stored unopened at room temperature.

QUALITY ASSURANCE

SC Johnson Professional products are manufactured in facilities which follow appropriate quality assurance practices, including with respect to quality control processes for raw materials and finished goods, and comply with any regulatory requirements applicable to the manufacturing of such products.

COMPATIBILITY TESTS

Rubber Production Process Compatibility

In testing conducted by the Deutsches Institut für Kautschuktechnologie (DIK) in accordance with DIN EN ISO/IEC 17025, the use of Travabon® CLASSIC cream in rubber production process does not influence the cohesive strength of rubber.

PRODUCT SAFETY ASSURANCE

Product Safety Assessment

The product has been assessed by an independent toxicologist and is declared safe for intended use on the hands of adults aged 16 and above when used as directed, meeting all relevant regulatory requirements.

Skin Compatibility Test

Independent dermatological tests conducted to assess the skin compatibility of the product using voluntary test persons in occlusive, 69 consecutive hour application models, shows the product to be non-irritating in use.

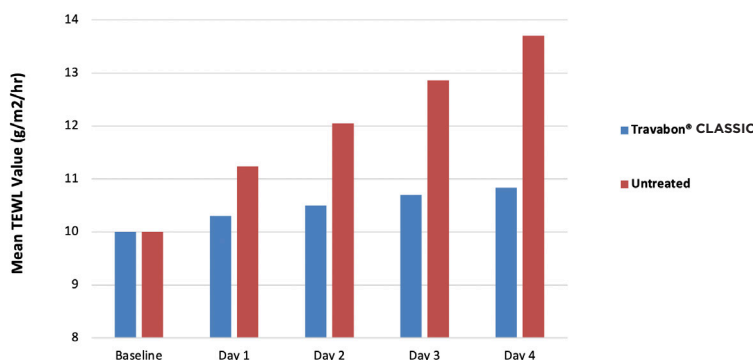

EFFICACY TESTS

Barrier Property Test

Repeated Occlusive Irritation Patch Testing using 25 healthy panelists was conducted using one water soluble substance (Sodium Lauryl Sulphate) and one non-water based substance (Ethyl Acetate/ Undecylenic Acid, 1:1). Each substance was applied at one time per day for 30 minutes over 4 days, alternating the water-based substance in the morning and non water based in the afternoon. Results show Travabon® CLASSIC cream significantly reduces the Visual Skin Erythema and Trans Epidermal Water Loss (TEWL) compared to unprotected skin.

Barrier Property Test

Repeated 4 Day Occluded Irritation Test

Hand Cleaning Test

Hand cleaning efficacy was tested using 10 healthy test panelists using a standardized model soiling (carbon black, iron oxide, graphite, petrolatum, oil, wax). Using only water to remove soil, the level of the residual dirt was assessed. Results show that when rinsed with water alone, 91% of the soil is removed from the skin when the hands are pretreated with Travabon® CLASSIC cream.

INGREDIENTS

Aqua (Water), Talc, Glycerin, Sodium Cocoyl Isethionate, Stearic Acid, Laureth-10, Distarch Phosphate, Polyglyceryl-2 Dipolyhydroxystearate, Algin, Bentonite, Xanthan Gum, Potassium Sorbate, Lactic Acid, Parfum (Fragrance), Sodium Isethionate, Sodium Phosphate, Diethylhexyl Sodium Sulfosuccinate, Titanium Dioxide, Propylene Glycol, Silver Chloride
