

BELT

PRODUCT DESCRIPTION

The TruShot 2.0® Mobile Dilution System moves with you!

- The TruShot 2.0® Belt is designed to help keep your cleaning operative cleaning without interruption. It ensures the user has great mobility - whether it be an office, a restaurant, or any type of building or professional environment - it eliminates the need to keep returning to the supply closet.

SECTORS OF USE

Suitable for professional settings such as: offices and municipalities, education, food services, contract cleaners, retail, transport, sport and leisure facilities, hospitality / hotels and lodgings, etc.

HOW TO USE

Step 1:

Lay out the components of the belt in the configuration you wish to use with the back of the pouches on the table side. You may choose to include fewer bags or place them in a different order than shown, depending on your workflow and needs.

Step 2:

Thread the belt itself through the loop of the first pouch all the way through the loop. Then continue to thread the belt through the remainder of the pouches until all desired pouches are in place in the order you wish to wear them.

Step 3:

Place the belt around your waist in the most comfortable location for the individual. Some users may wish to wear it higher and some may wish to wear it on the hips.

Lay one side of the belt on to the body, then align the other side to the desired tightness, and fasten the two sides together completing the loop closure. It is important to try to align the belt in a straight line to make it easier to slide the pouches around when needed.

Step 4:

Add products to the pouches. The large pouch is designed to fit the TruShot 2.0® Trigger Dispenser with or without a cartridge attached. The small pouches are designed to fit TruShot 2.0™ 266ml cartridge concentrates. Adjust location of the pouches around the belt loop and body for comfort and best use.

For more information on TruShot 2.0® trigger and cartridges refer to the product sheets.
