INNOVATION

	FEATURES	BENEFITS
EFFICIENCY	Mobility and autonomy	Portable and comfortable, users can move easily between floors and buildings thanks to Trushot 2.0® system!
	Saves time and boosts productivity	TruShot 2.0® system saves over 70% of walking time and refill time by being able to fill it at the nearest water source, as opposed to returning to the janitorial cupboard. This equates to 48 hours of productivity per full time employee per year ³ .
	Accurate optimised dilution	Built-in metering technology delivers exactly 1.0ml of optimally diluted solution per spray. This eliminates guesswork, prevents costly over or underdosing, ensuring a consistent cleaning performance each time.
	Highly economical	Supplies up to the equivalent of 8 to 30 ready-to-use litres and 11 to 40 750ml, RTU bottles (depending on the cartridge). Refer to the label for more details. Helps reduce waste from pre-mixed or diluted ready-to-use products.
	One system, many surfaces	With 4 different hard surface cleaning concentrates, a wide variety of cleaning needs can be met. Multi-surfaces cleaning and disinfection, cleaning in washrooms, kitchens or tough soiling, glass and windows.
	Easy to use and intuitive system	Easy to refill, easy to use, easy to carry. One sprayer for ALL formulas.
SECURED SYSTEM	Zero prep, fast training	Cleaning teams are trained in minutes, with no manual mixing, prep time, or relabelling required. Dilution is automatic and accurate, freeing managers from checking and reducing any formulation waste from human error.
	Snap-in, colour-coded cartridges	Colour-coded, easy-to-read cartridges that simplify identification and help support compliance. While spill-free, snap-in design ensures fast, mess-free changes for cleaning teams.
SUSTAINABILITY FOCUSED	No mixing	Sealed cartridges reduce exposure to concentrated product. No concentrate is dispensed when water tank is empty.
	Plastic savings	TruShot 2.0® system, it reduces the use of plastic by 91% versus using an equivalent ready-to-use 750ml bottle with sprayers over the life of a trigger ⁴ .
	Durable, reusable trigger	Trigger has been tested to last up to 250,000 trigger pulls, with only the cartridge that needs to be changed. The bottle construction withstands 1.8m drop test.

³ Sponsored ISSA Full Time Study & Cleaning Time Validation Report, US, May 2023.

⁴ Over the life of a TruShot 2.0® trigger and TruShot 2.0® Glass & Multi-Surface Cleaner cartridges, compared to the usage of 750ml bottles with sprayers (containing 65 grams of plastic).

Case dimensions: H 15.2cm x W 15.8cm x L 30cm

For more information on TruShot 2.0® system and cartridges refer to the product sheets.

2 HACCP International Certified

TruShot 2.0® Multi-Surface Cleaner & Disinfectant and TruShot 2.0® Power Cleaner & Degreaser (when used with the TruShot 2.0® sprayer) are suitable for food establishments operating in accordance with an HACCP-based food safety programme, in the secondary food zone (FZS) of the facility.

TruShot 2.0® Glass & Multi-Surface Cleaner (when used with the TruShot 2.0® sprayer) is suitable for food establishments operating in accordance with a HACCP-based food safety programme, in the Splash and Spill Zone (SSZ) of the facility.

This means products are suitable for use in food handling areas such as kitchens, production areas and processing areas, but not suitable for coming directly into contact with food or items that will touch food.

HACCP International's evaluation and certification is strictly confined to matters of food safety or the operation of a HACCP based food safety programme. Whilst all reasonable care is taken by HACCP International in its evaluation of the product(s) or services(s) described herein, HACCP International does not guarantee that every food safety risk in every application has been identified. No guarantee is offered or implied in the issuing of this statement.

Food handlers should use product only in accordance with usage instructions and product should not come directly into contact with food or items that contain food.
