MOISTURIZATION

The moisturization properties of Alcare OR[®] were assessed via Forearm Controlled Application Test (FCAT) for a single application, at an independent laboratory facility. Skin Hydration was measured at baseline and at one and two hours following the application of the test product, using the Skicon-200[®] Skin Surface Hygrometer. Results show that Alcare OR[®] demonstrated statistically significant immediate moisturization that lasted up to two hours following the application of the product.

SKIN COMPATIBILITY

Independent clinical dermatological tests conducted to assess the skin compatibility of the product using voluntary test persons in semi occlusive, 48 consecutive hour application models, show the product to be nonirritating in use.
