

SCJ Professional® Proline WAVE 1 Litre Dispenser Made of 70%* Recovered Coastal Plastic**

PRODUCT DESCRIPTION

Unique 1 litre closed, sealed cartridge dispenser that is made of 70%* recovered coastal plastic** and is suitable for use in any washroom, workplace and public facility environment.

**Recovered coastal plastic is post-consumer recycled plastic collected on land within 30 miles / 50 km of an ocean so that it does not reach oceans or landfills in countries with high volumes of uncollected plastic waste, in partnership with Plastic Bank™

USAGE

For exclusive use with our full SC Johnson Professional® range of hand wash soaps.

METHOD OF USE

Large, 'easy-push' button dispenses a controlled dose of product appropriate for the application required and empty cartridges are easily replaced in seconds.

*Recovered Coastal Plastic is 100% of the plastic used in the backplate and frontcover

FEATURES	BENEFITS
Made of 70% Recovered Coastal Plastic	Recovered Coastal Plastic is 100% of the plastic used in the backplate and frontcover**, which is equivalent to 16 x 500ml waste plastic bottles. This is part of our commitment to support the clean-up of plastic waste bound for the oceans and landfills in coastal areas with high volumes of uncollected waste.
In partnership with Plastic Bank™	Both SC Johnson and SC Johnson Professional are working in partnership with the Plastic Bank™ organisation, which coordinates the collection of plastic bottles bound for the ocean and landfill in countries with high volumes of uncollected plastic waste and then converts into post-consumer recycled plastic (PCR).
Robust design	All SC Johnson Professional® dispensers are manufactured from durable plastic components and rigorously tested for high usage environments, providing assurance of quality and longevity.
Guaranteed for life	SC Johnson Professional® dispensers are built to last and guaranteed for life. If a dispenser breaks we will replace it. Check with your local SC Johnson Professional team for the terms and conditions applicable to the guarantee.
BioCote® protected button 	BioCote® silver ion technology effectively reduces bacteria, mould and fungi on the surface of BioCote® treated SCJ Professional® dispenser buttons within as little as 2 hours and achieves up to 99.99% reduction over a 24 hour period†. BioCote® maintains its antimicrobial protection for the lifetime of the dispenser button and will not wear off, wash off or leach out. BioCote® technology is not a substitute for good hand hygiene practices.
Large push button	Minimise the operation force required to allow easy use by hand or elbow; suitable in hygiene sensitive areas.
Fixed product dose	Delivers the exact amount required, controlling usage and reducing waste.
Unique locking mechanism	Helps prevent unauthorised access, pilferage and product contamination.
Sight glass	Indicates the presence of a cartridge.
Simple cartridge replacement	Designed for exclusive use with SCJ Professional® skin care system products to enable cartridges to be replaced in seconds, reducing maintenance time and costs.
Hygienic, airless cartridge	The ultrasonically sealed cartridge and pump mechanisms prevent the ingress of air into the cartridge during use to help prevent product contamination and ensure 'fresh' product is dispensed every time.
Minimal waste	The air-tight cartridges are designed to collapse to minimise product waste.
Battery Free	Our dispensers are battery free, reducing costs and the risk of landfill contamination.

† BioCote® is a registered trademark of Biocote Limited. Efficacy is independently validated by ISO methods.
