

PROTECT

Travabon® Special PURE

Specialist Skin Defense Cream

PRODUCT DESCRIPTION

Specialist perfume-free and dye-free pre-work cream to protect against solvent-containing substances and resins.

WHERE TO USE

Heavy adherent contamination (such as resins, adhesives, sealants) where gloves are not worn.

HOW TO USE

- Apply to clean and dry skin before starting work, after washing hands and after lengthy breaks
- Rub small amount of product on areas of skin at risk, including between the fingers and on the fingernails

NB: Using skin care products does not release you from your duty to take the prescribed protective measures

FORMAT: CREAM

FEATURES	BENEFITS
Specialist formulation	<ul style="list-style-type: none"> • Designed to protect the skin from adherent substances
Contains a very high proportion of inorganic minerals (Talc and Kaolin)	<ul style="list-style-type: none"> • Forms a stable physical protective layer on the skin, which helps prevent contaminants from penetrating deeply into the skin • This protective action has a particularly positive effect where skin comes into contact with resins and organic solvents
Contains the natural film building agent Algin	<ul style="list-style-type: none"> • Helps reinforce the protective film on the skin for greater durability
Specially formulated to also be used on the face	<ul style="list-style-type: none"> • Ideal for application where the face might be exposed to contaminants as a supplement to PPE
Perfume-free and Dye-free	<ul style="list-style-type: none"> • Universally accepted • Ideal for people who are sensitive to fragrances
Contains Glycerin	<ul style="list-style-type: none"> • Active ingredient known to support the skin's natural barrier function
Silicone-free	<ul style="list-style-type: none"> • The product will have no adverse effect if in contact with surfaces prior to the application of paint or surface coatings

INGREDIENTS

AQUA (WATER), TALC, KAOLIN, POTASSIUM STEARATE, GLYCERIN, STEARIC ACID, PETROLATUM, LANOLIN ALCOHOL, ALGIN, METHYLPARABEN, DEHYDROACETIC ACID, SORBIC ACID, PROPYLPARABEN

STATUTORY REGULATIONS

This product is manufactured and labeled in compliance with the Federal, Drug, and Cosmetic Act issued by the Food and Drug Administration (FDA).

QUALITY ASSURANCE

Deb products are manufactured in facilities which follow Current Good Manufacturing Practice (cGMP) and/or Cosmetic GMP requirements.

All raw material used for production undergo a thorough quality control process before being used for manufacturing in Deb's high quality products.

All finished products are subject to intensive quality testing before being shipped out to our customers.

PRODUCT SAFETY ASSURANCE

Skin Compatibility Test: The skin compatibility of Travabon® Special PURE was tested using state of the art dermatological tests using voluntary test panels. In these tests, as well as in practical use, Travabon® Special PURE has proven to have very good skin compatibility.

Toxicological Approval: The product has been independently assessed for human toxicity and product stability. It is declared safe for intended use, meeting all relevant regulatory requirements.

Skin Hypoallergenic Risk Assessment: The formulation has been assessed by an independent toxicologist to be formulated in such a way as to provide either minimal or no risk of provoking an allergic skin response and thus meets the requirements for being described as "Hypoallergenic" (Delphic Solutions Ltd, UK).

Allergy sufferers should always refer to the ingredient list before using the product.

PACK SIZES

SHELF LIFE

This product has a shelf life of at least 30 months from the date of manufacture when stored unopened at room temperature.

SAFETY DATA SHEETS

For Safety, Environmental, Handling, First Aid and Disposal information, please refer to the Safety Data Sheet which can be downloaded from www.debgroup.com/us/sds.

EFFICACY TESTS

Skin Protection Test: Independent testing using an oil based substance known to be very aggressive to the skin (Toluene*) on ex-vivo human skin explants was conducted by The Karlsruhe Skin Clinic. This study demonstrated that Travabon® Special PURE effectively protects the skin against oil based irritants.

Figure 1: an image of the cross section of skin after exposure to Toluene for 90 minutes: large blisters appear below the epidermis of the unprotected skin and result in the epidermis and dermis becoming damaged and detached.

Figure 2: an image of the cross section of skin after application of Travabon® Special PURE and then exposure to Toluene for 90 minutes: the epidermis has remained largely undamaged and there is only a slight subepidermal damage visible. This demonstrates the protective effect of Travabon® Special PURE

FIGURE 1 Unprotected skin

FIGURE 2 Protected by Travabon® Special PURE

* Toluene was used in this controlled study to demonstrate the benefit of Travabon® Special PURE. Suitable gloves and PPE should be worn when handling aggressive chemicals such as Toluene.
